Editorials

- 1337 Complement Biomarkers of Hemolytic Uremic Syndrome-If Not One Thing, Maybe Another Joshua M. Thurman
- 1340 Improving Prognostic Tools for Patients With Myelodysplastic Syndromes Guillermo Garcia-Manero
- 1343 Cardiovascular Benefits of Group Sport Interventions: Importance of Improved Fitness in Risk Reduction Jan A. Laukkanen

Commentary

1346 Medication Nonadherence: There's an App for That! Jennifer B. McCormick, Michael J. Green, and Daniel Shapiro

Original Articles

- 1351 Diagnostic Utility of Complement Serology for Atypical Hemolytic Uremic Syndrome Meera Sridharan, Ronald S. Go, Roshini S. Abraham, Femando C. Fervenza, Sanjeev Sethi, Sandra C. Bryant, Grant M. Spears, David L. Murray, and Maria A.V. Willrich 🦚 🛟
 - When used in conjunction with clinical presentation, abnormalities in complement serology can support a physician's clinical acumen in the diagnosis of atypical hemolytic uremic syndrome.
- 1363 Mayo Alliance Prognostic Model for Myelodysplastic Syndromes: Integration of Genetic and Clinical Information

Ayalew Tefferi, Naseema Gangat, Mythri Mudireddy, Terra L Lasho, Christy Finke, Kebede H. Begna, Michelle A. Elliott, Aref Al-Kali, Mark R. Litzow, C. Christopher Hook, Alexandra P. Wolanskyj, William J. Hogan, Mrinal M. Patnaik, Animesh Pardanani, Darci L. Zblewski, Rong He, David Viswanatha, Curtis A. Hanson, Rhett P. Ketterling, Jih-Luh Tang, Wen-Chien Chou, Chien-Chin Lin, Cheng-Hong Tsai, Hwei-Fang Tien, and Hsin-An Hou 🤼 🌎

The authors propose a simple and contemporary risk model for myelodysplastic syndrome that is based on a limited set of genetic and clinical variables.

- 1375 Cardiometabolic Risk Reduction Through Recreational Group Sport Interventions in Adults: A Systematic Review and Meta-analysis
 - Moriah P. Bellissimo, Karla I. Galaviz, Meredith C. Paskert, and Felipe Lobelo 🦚 🛟

Group sport participation, primarily recreational soccer, was associated with broad-reaching and clinically important improvements in body composition, lipid profiles, blood pressure, and aerobic fitness.

Thirty-Day Readmission Rate in Acute Heart Failure Patients Discharged Against Medical Advice 1397 in a Matched Cohort Study

Brijesh Patel, George Prousi, Mahek Shah, Paul Secheresiu, Lohit Garg, Manyoo Agarwal, Shantanu Patil, Rahul Gupta, and Bruce Feldman

This study of a nationwide population is the first to report that I in 3 patients with acute heart failure discharged against medical advice needed readmission within 30 days.

1404 Acute Myocardial Infarction During Pregnancy and the Puerperium in the United States Nathaniel R. Smilowitz, Navdeep Gupta, Yu Guo, Judy Zhong, Catherine R. Weinberg, Harmony R. Reynolds, and Sripal Bangalore (1)

The increasing incidence of acute myocardial infarction complicating pregnancy is remarkable, as it occurred despite advances in reduction of cardiovascular risk over the past decade.

1415 Overall and Cause-Specific Mortality of Inflammatory Bowel Disease in Olmsted County, Minnesota, From 1970 Through 2016 Satimai Aniwan, W. Scott Harmsen, William J. Tremaine, Sunanda V. Kane, and Edward V. Loftus Jr 🌑 Overall mortality in patients with Crohn disease diagnosed after 1980 did not differ from that in the US background population. Overall mortality in patients with ulcerative colitis diagnosed from 1970 through 2010 was lower than expected.

1423 Food Allergy: A Comprehensive Population-Based Cohort Study Erin K. Willits, Miguel A. Park, Martha F. Hartz, Cathy D. Schleck, Amy L. Weaver, and Avni Y. Joshi 🚯 🛟 This population-based study showed a higher incidence of food allergy in males, milk is the most common allergen in infancy, and peanut allergy is more common in children between the ages of I and 5 years.

1431 A Before and After Analysis of Health Care Utilization by Patients Enrolled in Opioid Controlled Substance Agreements for Chronic Noncancer Pain Lindsey M. Philpot, Priya Ramar, Muhamad Y. Elrashidi, Tiffany A. Sinclair, and Jon O. Ebbert 🌎 For patients receiving long-term opioid therapy for chronic noncancer pain, enrollment in a controlled substance agreement is associated with reductions in primary care visits and increased radiologic service utilization.

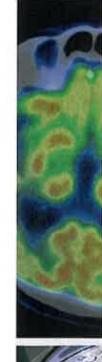

1440 Ganglionic Antibody Level as a Predictor of Severity of Autonomic Failure Jeremy K. Cutsforth-Gregory, Andrew McKeon, Elizabeth A. Coon, David M. Sletten, Mariana Suarez, Paola Sandroni, Wolfgang Singer, Eduardo E. Benarroch, Robert D. Fealey, and Phillip A. Low 🚷 🛟 A ganglionic AChR-Ab level of at least 0.40 nmol/L is a moderately sensitive and highly specific test for severe autonomic failure.

1448 Outcomes of Percutaneous Coronary Interventions in Patients With Anemia Presenting With Acute Coronary Syndrome Mohammed A. Al-Hijji, Rajiv Gulati, Ryan J. Lennon, Malcolm Bell, Abdallah El Sabbagh, Jae Yoon Park, Joshua Slusser, Gurpreet S. Sandhu, Guy S. Reeder, Charanjit S. Rihal, and Mandeep Singh 🦚 🛟 Anemia appeared to be an independent risk factor for increased long-term all-cause and noncardiac mortality.

1462 Risk of Severe Cardiovascular Events From Add-On Tiotropium in Chronic Obstructive Pulmonary Disease Jun-Ting Liou, Chen Wei Lin, Chen-Liang Tsai, Yun-Han Wang, Jyun-Heng Lai, Yu-Juei Hsu, and Meng-Ting Wang 🚯 Tiotropium newly added to long-acting \(\beta \) agonists/inhaled corticosteroids combination therapy was associated with

an increased cardiovascular risk in patients with chronic obstructive pulmonary disease.

1474 Association of Statin Use With Mortality After Dialysis-Requiring Acute Kidney Injury: A Population-Based Cohort Study Chia-Lin Wu, Chew-Teng Kor, Chia-Chu Chang, Ping-Fang Chiu, Der-Chemg Tamg, and Chih-Cheng Hsu 🛟 Statin use was independently associated with reduced risks of I-year and in-hospital mortality in patients with dialysis-requiring acute kidney injury.

Brief Report

Sex Differences in Time Spent on Household Activities and Care of Children Among US Physicians, 2003-2016

Dan P. Ly and Anupam B. Jena

Reviews

- 1488 COPD Guidelines: A Review of the 2018 GOLD Report
 Shireen Mirza, Ryan D. Clay, Matthew A. Koslow, and Paul D. Scanlon
- 1503 Influence of Renal Function on the Pharmacokinetics, Pharmacodynamics, Efficacy, and Safety of Non-Vitamin K Antagonist Oral Anticoagulants

 Matthew R. Weir and Reinhold Kreutz

Please note that articles with an "e" page designation are available only in the online version of the Journal at www.mayoclinicproceedings.org

Residents' Clinic

- 1520 72-Year-Old Woman With Fatigue, Confusion, and Severe Acute Renal Failure Xin Zhang, Aditya S. Pawar, and Eddie L. Greene
- 1525 59-Year-Old Man With Fatigue, Weight Loss, and Hepatomegaly Jacob J. Orme, Surbhi Sidana, and Wilson I. Gonsalves
- e103 48-Year-Old Woman With Bilateral Lower Extremity Paresthesias and Weakness Julian A. Marin-Acevedo, ErinMarie O. Kimbrough, and Razvan M. Chirila

Letters to the Editor

- 1530 A Relationship Between Proton Pump Inhibitors and Hypomagnesemia?

 Giuseppe Famularo
- 1530 In Reply—A Relationship Between Proton Pump Inhibitors and Hypomagnesemia? Avinash K. Nehra, Jeffrey A. Alexander, Conor G. Loftus, and Vandana Nehra
- 1531 Statin-Associated Achilles Tendon Rupture and Reproducible Bilateral Tendinopathy on Repeated Exposure
 Nader H. Moniri, Kathryn M. Momary, Timothy McMahon, and Ekta Nayee

Cover Image

The composite cover image highlights 3 salient themes: the wideranging effects of human biomedical research and discovery in driving progress in understanding and treating human disease (symbolized, on the left, by a neuron and its ramifying dendrites and axons); state-ofthe-art investigation in evaluating human disease (symbolized, in the middle, by a positron emission tomographic image of the brain); and the indispensability of teamwork and the coalescence of expertise in providing the best possible care for patients (symbolized, on the right, by a collaborating surgical/interventional team).
