1

Scientific Commentaries

Widespread synaptic loss in multiple sclerosis

M. A. Friese

2

Cerebellar damage limits reinforcement learning

R. C. Miall and J. Galea

4

What lies beneath grey matter atrophy in multiple sclerosis?

D. T. Chard and D. H. Miller

7

Altered intra- and inter-network dynamics reflect symptom dimensions in childhood-onset schizophrenia

T. M. Lancaster and J. Hall

10

Updates

Axial myopathy: an overlooked feature of muscle diseases

N. Witting, L. K. Andersen and J. Vissing

13

Is amyloid- β harmful to the brain? Insights from human imaging studies

W. Jagust

23

Reports

Free-thiamine is a potential biomarker of thiamine transporter-2 deficiency: a treatable cause of Leigh syndrome

J. D. Ortigoza-Escobar, M. Molero-Luis, A. Arias, A. Oyarzabal, N. Darín, M. Serrano, A. García-Cazorla, M. Tondo, M. Hernández, J. García-Villoria, M. Casado, L. Gort, J. A. Mayr, P. Rodríguez-Pombo, A. Ribes, R. Artuch and B. Pérez-Dueñas

31

Reconstruction of single cortical projection neurons reveals primary spine loss in multiple sclerosis

T. Jürgens, M. Jafari, M. Kreuzfeldt, E. Bahn, W. Brück, M. Kerschensteiner and D. Merkler

39

Visual short-term memory deficits in REM sleep behaviour disorder mirror those in Parkinson's disease

M. Rolinski, N. Zokaei, F. Baig, K. Giehl, T. Quinnell, Z. Zaiwalla, C. E. Mackay, M. Husain and M. T. M. Hu

47

Early detection of intentional harm in the human amygdala

E. Hesse, E. Mikulan, J. Decety, M. Sigman, M. del C. Garcia, W. Silva, C. Ciraolo, E. Vaucheret, F. Baglivo, D. Huepe, V. Lopez, F. Manes, T. A. Bekinschtein and A. Ibanez

54

Original Articles

Mutations in the *MORC2* gene cause axonal Charcot-Marie-Tooth disease

T. Sevilla, V. Lupo, D. Martínez-Rubio, P. Sancho, R. Sivera, M. J. Chumillas, M. García-Romero, S. I. Pascual-Pascual, N. Muelas, J. Dopazo, J. J. Vilchez, F. Palau and C. Espinós

62

***ALS5/SPG11/KIAA1840* mutations cause autosomal recessive axonal Charcot-Marie-Tooth disease**

C. Montecchiani, L. Pedace, T. Lo Giudice, A. Casella, M. Mearini, F. Gaudiello, J. L. Pedroso, C. Terracciano, C. Caltagirone, R. Massa, P. H. St George-Hyslop, O. G. P. Barsottini, T. Kawarai and A. Orlandi

73

***MTHFSD* and *DDX58* are novel RNA-binding proteins abnormally regulated in amyotrophic lateral sclerosis**

L. MacNair, S. Xiao, D. Miletic, M. Ghani, J.-P. Julien, J. Keith, L. Zinman, E. Rogava and J. Robertson

86

Effective reinforcement learning following cerebellar damage requires a balance between exploration and motor noise

A. S. Therrien, D. M. Wolpert and A. J. Bastian

101

Cortical atrophy patterns in multiple sclerosis are non-random and clinically relevant

M. D. Steenwijk, J. J. G. Geurts, M. Daams, B. M. Tijms, A. M. Wink, L. J. Balk, P. K. Tewarie, B. M. J. Uitdehaag, F. Barkhof, H. Vrenken and P. J. W. Pouwels

115

Primary motor cortex of the parkinsonian monkey: altered encoding of active movement

B. Pasquereau, M. R. DeLong and R. S. Turner

127

Neural correlates underlying micrographia in Parkinson's disease

T. Wu, J. Zhang, M. Hallett, T. Feng, Y. Hou and P. Chan

144

Different decision deficits impair response inhibition in progressive supranuclear palsy and Parkinson's disease

J. Zhang, T. Rittman, C. Nombela, A. Fois, I. Coyle-Gilchrist, R. A. Barker, L. E. Hughes and J. B. Rowe

161

Amyloid- β peptides act as allosteric modulators of cholinergic signalling through formation of soluble BA β ACs

R. Kumar, A. Nordberg and T. Darreh-Shori

174

Preclinical properties and human *in vivo* assessment of ¹²³I-ABC577 as a novel SPECT agent for imaging amyloid- β

Y. Maya, Y. Okumura, R. Kobayashi, T. Onishi, Y. Shoyama, O. Barret, D. Alagille, D. Jennings, K. Marek, J. Seibyl, G. Tamagnan, A. Tanaka and Y. Shirakami

193

Fair play: social norm compliance failures in behavioural variant frontotemporal dementia

C. O'Callaghan, M. Bertoux, M. Irish, J. M. Shine, S. Wong, L. Spiliopoulos, J. R. Hodges and M. Hornberger

204

Headache in acute ischaemic stroke: a lesion mapping study

C. L. Seifert, E. M. Schönbach, S. Magon, E. Gross, C. Zimmer, A. Förschler, T. R. Tölle, M. Mühlau, T. Sprenger and H. Poppert

217

Right hemisphere grey matter structure and language outcomes in chronic left hemisphere stroke

S. Xing, E. H. Lacey, L. M. Skipper-Kallal, X. Jiang, M. L. Harris-Love, J. Zeng and P. E. Turkeltaub

227

Frontal white matter hyperintensities, clasmotodendrosis and gliovascular abnormalities in ageing and post-stroke dementia

A. Chen, R. O. Akinyemi, Y. Hase, M. J. Firbank, M. N. Ndung'u, V. Foster, L. J. L. Craggs, K. Washida, Y. Okamoto, A. J. Thomas, T. M. Polvikoski, L. M. Allan, A. E. Oakley, J. T. O'Brien, K. Horsburgh, M. Ihara and R. N. Kalaria

242

Delayed intramuscular human neurotrophin-3 improves recovery in adult and elderly rats after stroke

D. A. Duricki, T. H. Hutson, C. Kathe, S. Soleman, D. Gonzalez-Carter, J. C. Petruska, H. D. Shine, Q. Chen, T. C. Wood, M. Bernanos, D. Cash, S. C. R. Williams, F. H. Gage and L. D. F. Moon

259

Disrupted sensorimotor and social-cognitive networks underlie symptoms in childhood-onset schizophrenia

R. A. Berman, S. J. Gotts, H. M. McAdams, D. Greenstein, F. Lalonde, L. Clasen, R. E. Watsky, L. Shora, A. E. Ordonez, A. Raznahan, A. Martin, N. Gogtay and J. Rapoport

276

Dorsal Column

Grey Matter

Ethical considerations in functional magnetic resonance imaging research in acutely comatose patients

C. Weljer, T. Brunl, T. Gofton, G. B. Young, L. Norton, A. Peterson and A. M. Owen

292

Book Review

Functional disorders: a neurologist's account

C. Bass

300

Letters to the Editor

Mitochondrial DNA copy number differentiates the Leber's hereditary optic neuropathy affected individuals from the unaffected mutation carriers

A. Bianco, I. Martínez-Romero, L. Bisceglia, L. D'Agruma, P. Favia, E. Ruiz-Pesini, S. Guerriero, J. Montoya and V. Petruzzella

e1

Reply: Mitochondrial DNA copy number differentiates the Leber's hereditary optic neuropathy affected individuals from the unaffected mutation carriers

C. Giordano and V. Carelli

e2

ALDH18A1 gene mutations cause dominant spastic paraplegia SPG9: loss of function effect and plausibility of a dominant negative mechanism

E. Panza, J. M. Escamilla-Honrubia, C. Marco-Marín, N. Gougeard, G. De Michele, V. Brescia Morra, R. Liguori, L. Salviati, M. A. Donati, R. Cusano, T. Pippucci, R. Ravazzolo, A. H. Németh, S. Smithson, S. Davies, J. A. Hurst, D. Bordo, V. Rublo and M. Seri

e3

Reply: ALDH18A1 gene mutations cause dominant spastic paraplegia SPG9: loss of function effect and plausibility of a dominant negative mechanism

M. Coutelier, F. Mochel, J.-M. Saudubray, C. Ottolenghi and G. Stevanin

e4

Skin biopsies in the differential diagnosis of parkinsonism: are we ready for simplified protocols?

K. Doppler, J. Volkmann and C. Sommer

e5

Reply: Skin biopsies in the differential diagnosis of parkinsonism: are we ready for simplified protocols?

L. Zange, C. Noack, K. Hahn, A. Lipp and W. Stenzel
