

Matéo

Cover image: This painting was done by Mateo Serratrice (6 years old) at school, two days after seeing the desktop wallpaper of his father's work computer. The painting depicts immunostaining of neurons during PhD studies. Sent by Nicolas Serratrice (MD, PhD, Neurosurgeon, spine and spinal cord surgeon, and very proud Dad of his son Mateo).

## Contents

### Editorial

**Brain 2023 essay competition**

M. Husain

2657

### Essay

**A journey towards the pot of gold**

V. Godefroy and A. Bouzigues

2658

### Scientific Commentaries

**Functional network reorganization precedes apathy in Parkinson's disease: a neural marker of risk?**

P. E. Mosley and G. A. Robinson

2661

**Thalamic stereo-EEG in epilepsy surgery: where do we stand?**

J. M. Bernabei, B. Litt and I. Cajigas

2663

**Precision diagnosis and staging of TDP-43 proteinopathies: harnessing the power of artificial intelligence**

R. A. Hickman and S. W. Scholz

2666

**Multistage neurosurgical mapping of low-grade glioma relapses reveals cortical remodelling**

L. Viganó and L. Bello

2669

### Review Articles

**Cell therapies for spinal cord injury: a review of the clinical trials and cell-type therapeutic potential**

B. F. Ribeiro, B. C. da Cruz, B. M. de Sousa, P. D. Correia, N. David, C. Rocha, R. D. Almeida, M. Ribeiro da Cunha,

A. A. Marques Baptista and S. I. Vieira

2672

**Epileptogenesis in tuberous sclerosis complex-related developmental and epileptic encephalopathy**

E. Aronica, N. Specchio, M. J. Luinenburg and P. Curatolo

2694

### Updates

**Neurofilament light chain in drug development for amyotrophic lateral sclerosis: a critical appraisal**

M. Benatar, J. Wu and M. R. Turner

2711

**Towards a multi-arm multi-stage platform trial of disease modifying approaches in Parkinson's disease**  
T. Foltynie, S. Gandhi, C. Gonzalez-Robles, M.-L. Zeissler, G. Mills, R. Barker, J. Carpenter, A. Schrag, A. Schapira, O. Bandmann, S. Mullin, J. Duffen, K. McFarthing, J. Chataway, M. Parmar and C. Carroll the EJS ACT-PD Consortium  
2717

## Reports

**Unexpected frequency of the pathogenic AR CAG repeat expansion in the general population**  
M. Zanovello, K. Ibáñez, A.-L. Brown, P. Sivakumar, A. Bombaci, L. Santos, J. J. F. A. van Vugt, G. Narzisi, R. Karra, S. W. Scholz, J. Ding, J. R. Gibbs, A. Chiò, C. Dalgard, B. Weisburd, The American Genome Center (TAGC) consortium, Genomics England Research Consortium, Project MinE ALS Sequencing Consortium, The NYGC ALS Consortium, M. G. Hanna, L. Greensmith, H. Phatnani, J. H. Veldink, B. J. Traynor, J. Polke, H. Houlden, P. Fratta and A. Tucci  
2723

**Variants in ATP5F1B are associated with dominantly inherited dystonia**  
A. Nasca, N. E. Mencacci, F. Invernizzi, M. Zech, I. J. Keller Sarmiento, A. Legati, C. Frascarelli, B. I. Bustos, L. M. Romito, D. Krainc, J. Winkelmann, M. Carecchio, N. Nardocci, G. Zorzi, H. Prokisch, S. J. Lubbe, B. Garavaglia and D. Ghezzi  
2730

## Original Articles

**Altered nucleus accumbens functional connectivity precedes apathy in Parkinson's disease**  
L.-A. Morris, S. J. Harrison, T. R. Melzer, J. C. Dalrymple-Alford, T. J. Anderson, M. R. MacAskill and C. J. Le Heron
