

European Heart Journal

Volume 46 No. 9 March 2025

ISSUE @ A GLANCE

Non-traditional risk factors and artificial intelligence in the management of atrial fibrillation

F. Crea

771

CardioPulse

Artificial intelligence in patients with atrial fibrillation to manage clinical complexity and comorbidities: the ARISTOTELES project

G. Boriani, D.A. Mei, and G.Y.H. Lip; on behalf of the ARISTOTELES Consortium

775

Shaping the future of cardiovascular research: a focus on cardioimmunology

S. Ben-Aicha and E.P.C. van der Vorst; Scientist of Tomorrow Nucleus Members

778

European Research Council-funded grant: programming the epicardium to cure broken hearts

T. Dorn and A. Moretti

781

FOCUS ISSUE ON ARRHYTHMIAS, DIGITAL HEALTH, AND INNOVATION

STATE OF THE ART REVIEW

Non-traditional risk factors for atrial fibrillation: epidemiology, mechanisms, and strategies

Y. Lu, Y. Sun, L. Cai, B. Yu, Y. Wang, X. Tan, H. Wan, D. Xu, J. Zhang, L. Qi, P. Sanders, and N. Wang

784

Atrial fibrillation ablation timing: where is the sweet spot?

J.M. Kalman, P.M. Kistler, G. Hindricks, and P. Sanders

805

Artificial intelligence and digital tools for design and execution of cardiovascular clinical trials

J.-R. Hu, J.R. Power, F. Zannad, and C.S.P. Lam

814

CLINICAL RESEARCH

Mechanism of syncope: role of ambulatory blood pressure monitoring and cardiovascular autonomic function assessment

A. Groppelli, V. Russo, E. Parente, A. Comune, F.J. de Lange, G. Rivasi, M. Rafanelli, J.C. Deharo, J. Francisco-Pascual, R. Maggi, A. Fedorowski, A. Ungar, G. Parati, and M. Brignole

827

Editorial

24-hour ambulatory blood pressure monitoring: a game changer in the management of reflex syncope?

P. Mitro

836

Artificial intelligence-derived electrocardiographic aging and risk of atrial fibrillation: a multi-national study

S. Cho, S. Eom, D. Kim, T.-H. Kim, J.-S. Uhm, H.-N. Pak, M.-H. Lee, P.-S. Yang, E. Lee, Z.I. Attia, P.A. Friedman, S.C. You, H.T. Yu, and B. Joung

839

Editorial

AI-ECG and prediction of new atrial fibrillation: when the heart tells the age

A.H. Ribeiro and A.L.P. Ribeiro

853

Electrocardiogram-based deep learning to predict mortality in paediatric and adult congenital heart disease

J. Mayourian, A. El-Bokl, P. Lukyanenko, W.G. La Cava, T. Geva, A.M. Valente, J.K. Triedman, and S.J. Ghelani

856

Editorial

Expanding artificial intelligence to understudied populations: congenital heart disease as the next frontier

E.K. Oikonomou and R. Khera

869

CARDIOVASCULAR FLASHLIGHTS

Malignant pheochromocytoma associated with pulmonary hypertension

D. Xie, X. Sun, and Y. Cao

872

Rate dependent complete right bundle block: a challenging diagnosis in Brugada syndrome

J. Yang, R. He, and P. Zhang

873

CardioPulse

Weekly Journal Scan

Weekly Journal Scan: The jury is still out on beta-blockers following acute myocardial infarction with preserved ejection fraction after the ABYSS trial

D. Pedicino and M. Volpe

874

CORRECTION

Correction to: Obesity and cardiovascular disease: an ESC clinical consensus statement

852

This is the first of the series for all ages. Medical literature is a vast area of study. It is important to stay up to date with the latest research. This series will provide you with the latest research in the field of cardiovascular medicine. It will also provide you with the latest research in the field of infectious diseases and other related fields. The series will be published in a series of articles. Each article will be written by a leading expert in the field. The series will be published in a series of articles. Each article will be written by a leading expert in the field. The series will be published in a series of articles. Each article will be written by a leading expert in the field.
