ON THE COVER

Gastroenterology

Stiffness Triggers IGF2BP2, Freezing Antitumor Immunity. See article by Tang, et al, page 615 for additional information.

COMMENTARIES

- 545 Recent US Gastric Cancer Prevention Recommendations: Advances, Unanswered Questions, and the Need for a Unified Approach**
D. T. Müller, J. F. O'mahony, M. Laszkowska, J. Yeh, C. Hur, I. Lansdorp-Vogelaar, and The CISNET-Gastric Group
- 551 Gastric Cancer Prevention in the United States: A Work in Progress**
R. J. Huang, P. Moayyedi, S. C. Shah, Y. Woo, A. Y. Wang, and J. H. Hwang

MENTORING, EDUCATION, AND TRAINING CORNER

- 557 Coaching in Gastroenterology Training**
I. Bhavsar-Burke, A. K. Miller Juve, and E. K. Boden

EDITORIALS

- 561 Function Over Form: Defining Evolutionarily Conserved Long Noncoding RNAs Regulating Hepatic Metabolism**
I. Huppertz and A. C. Mullen
See Jiang C et al on page 676.

GASTRO CURBSIDE CONSULT

- 564 A Rare Cause of Recurrent Abdominal Pain**
Z. Zhuang, R. Zhao, and Y. Zhang
- 568 An Unexpected Cause of Acute Liver Failure After Chimeric Antigen Receptor (CAR) T-Cell Therapy**
P. Kasper, C. Neumann-Haefelin, and G. Allo

Cover

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc., 1600 John F. Kennedy Boulevard, Suite 1600, Philadelphia, PA 1910, United States. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 450 Fame Avenue, Hanover, PA 17331, USA. 2025 US subscription rates: individual, \$848.00; student and resident, \$323.00. Outside of the U.S. and possessions: individual, \$1026.00; student and resident, \$596.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

ELECTRONIC GASTRO CURBSIDE CONSULT

For a full list, please see the table of contents online at www.gastrojournal.org.

REVIEWS IN BASIC AND CLINICAL GASTROENTEROLOGY AND HEPATOLOGY

- 572 **Acute Pancreatitis in Children: It's Not Just a Simple Attack**
F. Ahmed and M. Abu-El-Haija

- 585 **Advances in Locoregional and Systemic Treatments for Hepatocellular Carcinoma**
A. G. Singal, R. Salem, D. J. Pinato, and A. Pillai

ORIGINAL RESEARCH

Full Reports

GI Cancer

- 600 **Therapeutic Targeting of Oncogene-Induced Transcription-Replication Conflicts in Pancreatic Ductal Adenocarcinoma**
S. J. Smith, F. Meng, R. G. Lingeman, C. M. Li, M. Li, G. Boneh, T. T. Seppälä, T. Phan, H. Li, R. A. Burkhart, V. Parekh, S. Rahmanuddin, L. G. Melstrom, R. J. Hickey, V. Chung, Y. Liu, L. H. Malkas, and M. Raoof

Transcription-replication conflicts are a unique vulnerability in pancreatic cancer that can be targeted in the clinic using a novel small molecule inhibitor.

- 615 **Stromal Stiffness-Regulated IGF2BP2 in Pancreatic Cancer Drives Immune Evasion via Sphingomyelin Metabolism**
R. Tang, Z. Zhang, X. Liu, Y. Liao, Y. Chen, M. Xiao, Y. Li, C. Zhou, Z. Tan, C. Zhang, C. Chen, Z. Rong, Y. Liu, P. Li, Q. Du, Q. He, Y. Lei, Z. Wu, S. Lu, J. Xu, W. Wang, S. Shi, and X. Yu

Targeting stromal stiffness-activated IGF2BP2/N6-methyladenosine/SGMS2 mitigated sphingomyelin synthesis and PD-L1 membrane localization, boosting immunotherapeutic efficacy in pancreatic ductal adenocarcinoma.

Inflammatory Bowel Disease

- 632 **α 1,3 Fucosyltransferase VII Improves Intestinal Immune Homeostasis in Inflammatory Bowel Disease by Enhancing Regulatory T-Cell Intestinal Homing and Immunosuppression**

K. Liu, B. Chen, X. Lin, Q. Zhou, T. Ben, J. Xu, Y. Zhang, X. Zhang, Y. Chen, S. Li, F. Zhu, Y. Ren, F. Zhi, and G. Tan

α 1,3 Fucosyltransferase VII enhances regulatory T-cell intestinal homing and immunosuppression and up-regulating α 1,3 fucosyltransferase VII expression in regulatory T cells with the designed nanocarrier has potential as an effective therapeutic approach for patients with inflammatory bowel disease.

- 647 **Active Inflammatory Bowel Disease on Intestinal Ultrasound During Pregnancy Is Associated With an Increased Risk of Adverse Pregnancy and Neonatal Outcomes Independent of Clinical and Biochemical Disease Activity**

R. E. Prentice, E. K. Flanagan, E. K. Wright, M. T. Dolinger, Z. Gottlieb, A. L. Ross, M. Burns, D. Con, E. Shelton, R. Boyapati, I. Aronsky, G. T. Moore, W. Connell, M. P. Sparrow, P. De Cruz, M. A. Kamm, I. Prideaux, R. Goldberg, K. V. Kiburg, M. C. Dubinsky, and S. J. Bell

Disease activity detected on bowel ultrasound in pregnancy increases the risk of negative pregnancy outcomes, such as preterm delivery, including when symptoms of flare are not present.

Colon

- 663** **Gene-Specific Detection Rate of Adenomas and Advanced Adenomas in Lynch Syndrome**
 A. Sánchez, J. Castillo-Iturra, V. H. Roos, N. Dueñas, M. Pineda, L. Moreno, L. Rodríguez-Alonso, T. Ramon y Cajal, G. Llorca, V. Piñol, A. Lopez Fernandez, I. Salces, M. D. Picó, L. Rivas, L. Bujanda, M. Garzon, A. Pizarro, E. Martinez de Castro, M. J. Lopez-Arias, C. Poves, C. Garau, D. Rodriguez-Alcalde, M. Herraiz, C. Alvarez-Urrutia, A. Dacal, M. Carrillo-Palau, L. Cid, M. Ponce, E. Barreiro-Alonso, E. Saperas, E. Aguirre, B. Bastiaansen, T. Ocaña, S. Carballal, L. Rivero-Sanchez, O. Ortiz, M. Dacal-Alvarez, R. Prat-Galito, X. Bessa, J. Cubiella, R. Jover, F. Rodríguez-Moranta, J. Balmaña, J. Brunet, A. Castells, G. Capellá, U. Ladabaum, E. Dekker, L. Moreira, M. Pellisé, and F. Balaguer

Lynch syndrome increases the risk of colorectal cancer, and this study found that *MLH1* and *MSH2* pathogenic variant carriers are more likely to develop advanced adenomas. Individuals with advanced adenomas may need enhanced colonoscopy surveillance to more effectively prevent colorectal cancer.

Hepatobiliary

- 676** **Systemic Identification of Functionally Conserved Long Noncoding RNA Metabolic Regulators in Human and Mouse Livers**
 C. Jiang, Z. Li, S. Seok, P. Li, Y. Ma, S. K. Podguski, S. Moturi, N. Yoneda, K. Kawai, S. Uehara, Y. Ohnishi, H. Suemizu, J. Zhang, and H. Cao
- See editorial on page 561.

This study introduces the concept of functionally conserved long noncoding RNAs, which are long noncoding RNAs in humans and mice that lack sequence conservation but share similar biological functions.

- 691** **Adipose Tissue Macrophages in Metabolic Dysfunction-Associated Steatohepatitis Secrete Extracellular Vesicles That Activate Liver Fibrosis in Obese Male Mice**
 T. V. Rohm, F. C. G. Dos Reis, K. Cunha e Rocha, R. Isaac, S. Strayer, C. Murphy, G. Bandyopadhyay, H. Gao, S. Ganguly, T. Nguyen, J. Wang, J. E. Youhanna, D. Pack, X. Liu, H. Y. Kim, I. Jeelani, D. Dhar, T. Kisseleva, W. Ying, and J. M. Olefsky

Extrahepatic small extracellular vesicles secreted from adipose tissue macrophages promote liver fibrosis in obesity, suggesting potential therapies, such as specific microRNA inhibitors, to treat liver disease.

- 705** **Associations of Alcohol Consumption and Genetic Predisposition to Hepatic Steatosis With Liver-Related Events: Results From Large Population-Based Cohort Studies**
 H. Xue, L. Wang, D. Sun, Y. Wu, C. Yu, Y. Huang, S. O. Chan, W. Ling, J. Lv, L. Li, X. Chen, Y. Pang, and C. Yu

Associations between alcohol intake and liver-related events vary across drinking categories, with those at higher genetic risk for hepatic steatosis being more susceptible to alcohol's effects.

RESEARCH LETTERS

- 715** **Large Language Model-Supported Systematic Reviews to Augment Clinical Guideline Development: An American Gastroenterological Association Pilot**
 S. Chung, B. Saberzadeh-Ardestani, G. Nigam, Y. Yuan, S. Singh, and D. Shung
- 718** **Relationship of Intrapancreatic Fat Deposition With Pancreatic Cancer Differs According to Carcinoma Types**
 H. Oyama, T. Hamada, D. Nevo, Y. Nakai, Y. Nakai, M. S. Petrov, and TOP-CREATE Study Group
- 722** **Safety and Efficacy of MEK Inhibitor Treatment for Gastric Precancerous Lesions**
 J. R. Goldenring, B. Jang, T. Gotoda, N. Yamaguchi, E. Choi, S. Nomura, and The Gastric Precancer Working Group

CLINICAL PRACTICE UPDATES

- 726** **AGA Clinical Practice Update on Incorporating Functional Lumen Imaging Probe Into Esophageal Clinical Practice: Expert Review**
 A. D. Nguyen, D. A. Carlson, A. Patel, and C. P. Gyawali

GASTRO DIGEST

- 737 The Paradox of Type III Interferons: A Delicate Balance Between Protection and Pathology in Colitis Development and Gut Tissue Repair**
D. Kotlarz
- 738 Spatial and Functional Specialization of Gut Enterochromaffin Cells in Sensory Signaling**
S. A. Najjar and K. G. Margolis

- 756 Reply**
C. Pilati, J. Taieb, and P. Laurent-Puig
- 758 Corrigenda**

Access to the full content of Gastroenterology Online is available to all subscribers!

AGA members have seamless access to full *Gastroenterology* content from the AGA Web site. Simply sign in to <http://www.gastro.org>, visit the Publications section of the Web site, and click on *Gastroenterology*. You will be directed to the Journal Web site and will have full access to all content without having to supply a different username and password. Members can also visit <http://www.gastrojournal.org> directly and click on "Activate Online Access." Nonmember subscribers must create an online user account and activate their subscription to access the full text of articles on *Gastroenterology* Online. To activate your individual online subscription, please visit <http://www.gastrojournal.org> and click on "Activate Online Access." To activate your account, you

will need your subscriber account or member number, which you can find on your mailing label, (AGA members must use their 10-digit member number, including leading zeros). If you have any questions regarding your online subscription please call Elsevier Customer Service at (800) 654-2452.

Institutional access to *Gastroenterology* Online will be allowed only by limited site licensing. Further instructions will be available online. Personal subscriptions to *Gastroenterology* Online are for individual use only and may not be transferred. Use of *Gastroenterology* Online is subject to agreement to the terms and conditions of use as indicated online.
