CONTENTS

Contents

ON THE COVER

Psychosocial Impact of Endoscopic Procedural Complications. See article by Holzwanger, et al, page 1510 for additional information.

IN MEMORIAM

1333 In Memoriam: Jaume Bosch, MD, PhD

J. G. Abraldes, G. Garcia-Tsao, and J. C. Garcia-Pagan

MENTORING, EDUCATION, AND TRAINING CORNER

1336 Reveal Your Sources: Designing Training Environments to Support Regulation of Learning

A. Gavarkovs, R. Brydges, and R. D. Jensen

EDITORIALS

1341 Where Self Meets Gluten in the Birth of Transglutaminase Autoantibodies in Celiac Disease

F. G. Chirido and R. P. Anderson

See du Pré MF et al on page 1450.

1344 Rethinking Nutrition in Inflammatory Bowel Disease: The Case for a Whole Food Approach

N. Haskey, S. L. Gold, and M. Raman

See Aharoni-Frutkoff Y et al on page 1462.

GASTRO CURBSIDE CONSULT

1346 An Often-Forgotten Complication of Upadacitinib

P. Te, R. Standish, and N. Heerasing

1350 A Case of Chronic Gastrointestinal Symptoms: Peeling Back the Mucosal Layers

J. Liu, K. O. Jones, and M. B. Hammami

1353 Shunting the Diagnosis of a Rapid Decline in Cognition

M. R. Troppmair, B. Schaefer, and M. Freund

Publisher: *Gastroenterology* (ISSN 0016-5085) is published monthly (semi-monthly in April) in two indexed volumes by Elsevier Inc., 1600 John F. Kennedy Boulevard, Suite 1600, Philadelphia, PA 1910, United States. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: Send address changes to Elsevier, Journal Returns, 450 Fame Avenue, Hanover, PA 17331, USA. 2025 US subscription rates: individual, \$848.00; student and resident, \$323.00. Outside of the U.S. and possessions: individual, \$1026.00; student and resident, \$596.00; surface delivery, no additional charge; air mail delivery, add \$78.00. Prices subject to change without notice.

REVIEWS IN BASIC AND CLINICAL GASTROENTEROLOGY AND HEPATOLOGY**1357 Senescence, Aging and Disease Throughout the Gastrointestinal System**

 S. Ferreira-Gonzalez, T. Matsumoto, E. Hara, and S. J. Forbes

1380 Circadian Rhythms in Gastroenterology: The Biological Clock's Impact on Gut Health

F. Bishehsari, Z. Post, G. R. Swanson, and A. Keshavarzian

GUIDELINES**1397 AGA Living Clinical Practice Guideline on the Pharmacologic Management of Moderate-to-Severe Crohn's Disease**

 F. I. Scott, A. N. Ananthakrishnan, B. Click, M. Agrawal, G. Syal, J. P. Haydek, Y. Yuan, M. D. Kappelman, J. D. Lewis, and S. Singh

1449 Spotlight: Pharmacologic Management of Moderate-to-Severe Crohn's Disease

F. I. Scott, A. N. Ananthakrishnan, B. Click, M. Agrawal, G. Syal, J. P. Haydek, Y. Yuan, M. D. Kappelman, J. D. Lewis, and S. Singh

ORIGINAL RESEARCH**Full Reports****Celiac Disease****1450 Peyer's Patch B Cells Sample Transglutaminase-Gluten Complexes and Drive Celiac Disease Autoimmunity**

  M. F. du Pré, L. Kleppa, A. E. Dewan, M. T. Meling, L. S. Høydahl, H. A. Besser, C. Khosla, and L. M. Sollid

See editorial on page 1341.

This study investigates how the enzyme TG2 can interact with gluten peptides in the gut lumen to drive TG2-specific B-cell responses in celiac disease.

Inflammatory Bowel Disease**1462 Whole Food Diet Induces Remission in Children and Young Adults With Mild to Moderate Crohn's Disease and Is More Tolerable Than Exclusive Enteral Nutrition: A Randomized Controlled Trial**

   Y. Aharoni-Frutkoff, L. Plotkin, D. Pollak, J. Livovsky, G. Focht, R. Lev-Tzion, O. Ledder, A. Assa, D. Yoge, E. Orlanski-Meyer, E. Broide, J. Kierkuś, B. Kang, B. Weiss, M. Aloï, T. Schwerd, D. S. Shouval, M. Bramuzzo, A. M. Griffiths, M. Yassour, and D. Turner

See editorial on page 1344.

An exclusive whole food diet called Tasty&Healthy helped children and young adults with Crohn's disease enter remission and was easier to follow than formula-based nutrition therapy.

1475 Dietary Patterns and Incident Chronic Constipation in Three Prospective Cohorts of Middle- and Older-Aged Adults

 Y. Wang, B. Kuo, M. Berschback, C. Huttenhower, A. T. Chan, and K. Staller

In 3 large prospective cohorts, the authors found that eating patterns rich in plant-based foods, like the Mediterranean diet, are associated with a reduced risk of developing constipation, whereas diets high in ultra-processed and pro-inflammatory foods, like the Western diet, are associated with an increased risk for constipation.

Functional GI Disease**1489 Association Between Adenoma Detection Rate and Prevalent Colorectal Cancer Detection Rate in a National Colonoscopy Registry**

 J. A. Dominitz, U. Ladabaum, J. L. Holub, R. B. Issaka, C. W. Ko, and D. J. Robertson

Endoscopists with lower precancerous polyp detection rates may also be missing cancers present at the time of colonoscopy, emphasizing the need for colonoscopy quality assurance.

1499 Total Pancreatectomy With Islet Autotransplantation for Chronic Pancreatitis

www

G. Trikudanathan, A. Eaton, M. L. Freeman, V. K. Singh, S. J. Schwarzenberg, J. D. Nathan, G. J. Beilman, M. Abu-El-Hajja, D. Adams, S. A. Ahmad, S. Chinnakotla, E. M. Downs, M. Faghih, T. B. Gardner, L. F. Lara, K. Morgan, S. P. Mokshagundam, B. Naziruddin, A. Posselt, T. L. Pruett, M. Wijkstrom, P. Witkowski, and M. D. Bellin

Total pancreatectomy with islet autotransplantation ameliorates pain and improves quality of life in patients with chronic pancreatitis with reduced severity of postpancreatectomy diabetes.
