ORIGINAL INVESTIGATION

127 Meningeal Embolization for Preventing Chronic Subdural Hematoma Recurrence After Surgery: The EMPROTECT Randomized Clinical Trial

E Shotar and Coauthors
for the EMPROTECT Investigators

This multicenter randomized clinical trial examines the effect of middle meningeal artery embolization on the recurrence of chronic subdural hematoma in patients who previously underwent an operation and are at high risk of recurrence.

Visual Abstract

136 Robotic vs Laparoscopic Surgery for Middle and Low Rectal Cancer: The REAL Randomized Clinical Trial

Q Feng and Coauthors
for the REAL Study Group

This randomized clinical trial compares the effects of robotic surgery vs conventional laparoscopic surgery on 3-year locoregional recurrence rates in patients with middle or low rectal cancer.
