229 Frequency and Clinical Outcomes Associated With Tau Positron Emission Tomography Positivity

A Moscoso and Coauthors

for the PREVENT-AD Research Group, the Harvard Aging Brain Study, the LEADS Consortium, and the Alzheimer's Disease Neuroimaging Initiative

This study used pooled data to estimate the frequency of tau positron emission tomography positivity and its associated risk of clinical outcomes.

243 Life Expectancy of American Indian and Alaska Native Persons and Underreporting of Mortality in Vital Statistics

J Bor and Coauthors

This longitudinal cohort study uses self-identified race and ethnicity data to examine age-specific mortality rates and life expectancy among American Indian and Alaska Native individuals.

PERSPECTIVE

209 The Black Prisoners of Stateville: Race, Research, and Reckoning at the Dawn of Precision Medicine

H Allen and J Tabery

This Perspective focuses on the experiences of Black participants in a malaria study, with insights on the gap between what gets promised in research and what gets delivered and about how to properly acknowledge people whose lasting impact on clinical research has been unjustly forgotten.

A PIECE OF MY MIND

212 Meaningful Work and the Echoes of Time

EA Klein

In this narrative medicine essay, a retired surgical oncologist reflects on experiences with his parents and his former patients and realizes that the true meaning of being a surgical oncologist is the joy of making futures possible and the sorrow of knowing their limits.

JAMA GUIDE TO STATISTICS AND METHODS

265 Tipping Point Analysis: Assessing the Potential Impact of Missing Data

Y Liu, K Zhou, and KD Sims

This JAMA Guide to Statistics and Methods explains tipping point analysis, which assesses how a range of hypothetical patterns in missing outcome data in a randomized clinical trial (RCT) would affect the study's conclusions, and examines its use in an RCT of treatment for hypertension.
