390 Acetaminophen for Prevention and Treatment of Organ Dysfunction in Critically Ill Patients With Sepsis: The ASTER Randomized Clinical Trial

LB Ware and Coauthors
for the National Heart, Lung, and Blood Institute Prevention and Early Treatment of Acute Lung Injury Clinical Trials Network

This randomized trial assesses whether acetaminophen would increase the number of days alive and free of organ support to day 28 among critically ill patients with sepsis and respiratory or circulatory organ dysfunction.

 Visual Abstract

401 Dapagliflozin for Critically Ill Patients With Acute Organ Dysfunction: The DEFENDER Randomized Clinical Trial

CAM Tavares and Coauthors
for the DEFENDER Investigators
This randomized clinical trial assesses whether adding dapagliflozin to standard care for patients with acute organ dysfunction could reduce the composite outcome of hospital mortality, initiation of kidney replacement therapy, and length of stay compared with standard care alone.

A PIECE OF MY MIND

373 The Long Walk

ME Sweet

In this narrative medicine essay, a patient who has outlasted all the other patients with her diagnosis cannot explain why or how she has survived and decides to commemorate her good fortune with a long walk from her home to the hospital.
