Research

ORIGINAL INVESTIGATION

470 Oral Glucose-Lowering Agents vs Insulin for Gestational Diabetes: A Randomized Clinical Trial

D Rademaker and Coauthors
and the SUGAR-DIP Study Group

This randomized clinical trial assesses whether treatment with oral metformin with added glyburide, if needed, is noninferior to insulin for prevention of large-for-gestational-age infants among pregnant individuals with gestational diabetes.

Editorial 465

[Visual Abstract](#)

479 Early Restrictive vs Liberal Oxygen for Trauma Patients: The TRAUMOX2 Randomized Clinical Trial

T Arleth and Coauthors
for the TRAUMOX2 Trial Group

This randomized controlled trial investigates whether an early 8-hour restrictive oxygen strategy compared with a liberal oxygen strategy lowers the incidence of death and/or major respiratory complications in severely injured trauma patients.

490 Changes in Patient Care Experience After Private Equity Acquisition of US Hospitals

A Bhatla and Coauthors

This cross-sectional study compares global patient measures to determine whether patients experienced a change in care and whether hospital communication, clinical process, and environment changed from before a hospital had been acquired to after it had been acquired by private equity firms.
