ORIGINAL INVESTIGATION

582 Intra-arterial Tenecteplase for Acute Stroke After Successful Endovascular Therapy: The ANGEL-TNK Randomized Clinical Trial
Z Miao and Coauthors
for the ANGEL-TNK Investigators

This randomized clinical trial examines the efficacy and safety of intra-arterial tenecteplase in patients with successful endovascular therapy.

Visual Abstract

592 Telehealth and Online Cognitive Behavioral Therapy–Based Treatments for High-Impact Chronic Pain: A Randomized Clinical Trial

LL DeBar and Coauthors

This randomized clinical trial examines the effectiveness of remote, scalable cognitive behavioral therapy–based chronic pain (CBT-CP) treatments (telehealth and self-completed online) for adult individuals with high-impact chronic pain, compared with usual care.

PERSPECTIVE

573 Insurance Coverage Without Cost Sharing for Preventive Health Care Restored by the Supreme Court

G Curfman, M Boumil, and K Bibbins-Domingo

This Perspective discusses the recent decision by the US Supreme Court to maintain the authority of the US Preventive Services Task Force to issue recommendations on preventive health care services, but also how it opens the door for the Department of Health and Human Services secretary to have supervisory authority over the Task Force, threatening its independence.

A PIECE OF MY MIND

576 Crossing Boundaries

A Grubner

In an effort to ease the emotional devastation of parents who had just learned their child has diabetes, a pediatric emergency medicine fellow struggles with crossing the professional–personal line to share his experience with diabetes.

JAMA CLINICAL CHALLENGE

631 A 25-Year-Old With Palpitations, Fatigue, and Migraines

RB Jones Jr, ML Bonanni, and DL Cohen

A woman had palpitations, fatigue, and worsening migraines. Plasma normetanephrine concentration was elevated, plasma metanephrine concentration was within reference range, and abdominal magnetic resonance imaging showed a left infrarenal para-aortic mass. What is the diagnosis and what would you do next?
